Programe to find the greatest of two numbers.

```c
#include <stdio.h>
int main()
{
int no1, no2;
Printf ("Insert two numbers: ");
Scanf ("%d %d", & no1, no2);
if (no1 > no2)
   printf ("%d is greater", no1);
else
   printf ("%d is greater", no2);
return 0;
}
```

WAP to convert fahrenheit to celcius.

```c
#include <stdio.h>
void main()
{
float celcius, fahrenheit;
printf ("\n Enter temperature ");
scanf ("%f", & fahrenheit);
celcius = ((fahrenheit - 32) * 5)/9;
printf ("\ncelcius = %.3f", celcius);
}
```
